# doit Cloud Navigator

Technology to optimize your cloud

Understand, optimize, and control your cloud costs

DoiT Cloud Navigator empowers cloud-driven organizations, enabling informed decisions about their cloud usage. As IT demands evolve rapidly in response to ever-changing business requirements, DoiT Cloud Navigator helps maintain the pace and quality of engineering initiatives so they can effectively manage public cloud costs and infrastructure challenges.

DoiT Cloud Navigator

Cloud Analytics	Spot Scaling	Anomaly Detection	BigQuery Lens	Flexsave*
				*Exclusive to AWS cloud procurement customers

DoiT Platform

API	User Management	Invoicing	Single Sign-On	Integrations	Audit Log	Support Ops

"DoiT Cloud Navigator's customizable dashboards and the reports we can make have been incredibly beneficial in showing back cloud cost to our company, monitoring the growth within our cloud usage, and providing near real time cost anomalies."

## Help your engineers get fluent in their cloud costs

Utilizing DoiT Cloud Analytics, engineering teams can cultivate cost awareness and accountability throughout their organization. This empowers engineers to take ownership of their usage and make data-backed decisions on the infrastructure they're responsible for.

Optimize costs without sacrificing engineering resources

With DoiT's cost optimization capabilities, cloud-driven organizations have access to proprietary automation technology and easy-to-implement recommendations that help them optimize their rates, eliminate waste, and match requested resources to actual usage.
Control cloud costs with automation

DoiT Cloud Navigator includes several features that assist users in monitoring unwanted cloud consumption, enabling them to minimize variances in monthly bills and enhance the predictability of their cloud expenditures, all without exhausting limited engineering resources.

Connect your favorite tools to DoiT's product

From turning cost anomalies into a Jira task, to sending invoices straight to a payment tool, to automating scripting of repetitive tasks — the possibilities for what DoiT's APIs and integrations can do are endless.
